

Countdown Timer

February 12, 2023

```
[1]: import time
      from plyer import notification
```

```
[2]: # In Seconds
      count = 15

      notification.notify(title="Countdown Notification", message="Countdown Started")

      while count >= 0:
          mins = count//60
          secs = count%60

          print('Countdown : {:02d}:{:02d}'.format(mins, secs), end='\r')

          count -= 1

          time.sleep(1)

      notification.notify(title="Countdown Time", message="Countdown Ended")
```

Countdown : 00:00
